WORK EXPERIENCE

Server

Mar. 2022 – Current

Nakamori Japanese Restaurant, Scarborough, ON

- Ensure amazing guest experiences by seating guests, taking orders, serving food, and removing dinnerware with a positive attitude
- Get familiarized with loyal customers, their favourite menu, and their special requests
- Efficiently collaborate with other servers and the kitchen staff using great communication skills
- Knowledgeably explain food menu, Japanese cuisine culture, and traditional Sake flavours to customers
- Perform multitasking by taking care of takeout orders and dine-in customers at the same time

Software Developer

Oct. 2019 – Feb. 2021

SPIC, Tokyo, Japan

- Achieved 6 full-stack development including tests with 8 developers
- Consistently monitored web servers and DB servers for two vendors through analyzing logs and monitoring servers respectively
- Efficiently fixed bugs identified in web servers while performing daily monitoring checks
- Provided effective technical support for users via email and phone call by demonstrating exceptional customer service skills

- Collaborated with four engineers, efficiently learned the technique of writing practical codes, and acquired significant IT knowledge
- Updated server certificates for two Apache servers and created an instruction manual for future employees

HR Coordinator/Software Tester

Apr. 2013 – May. 2019

Taiju Life Insurance Company, Tokyo, Japan

- Performed balanced duties as an HR Coordinator performing assessments and handling administrative duties, as well as provided technical support and conducted testing as a Software Tester
- Collaborated with nine team members in the implementation of performance assessments for 8000 salespeople
- Performed black-box tests of assessment sheets based on software requirement documents and regulations with two other software engineers
- Managed the HR system including recruiting system, assessment system, and payroll system through close monitoring and scheduling tasks with two team members and twelve software engineers
- Consistently attended requirement gatherings with managers to convey and share opinions as a user when new software was in development
- Specialized in assessment regulations which contain performance criteria, promotion, salary, and retirement
- Provided technical support and shared assessment knowledge with 50+ branch managers as needed via phone and e-mail

PROJECT WORK

Web EDI application - Java, vue.js, and Oracle SQL

SPIC, Tokyo, Japan

- Successfully added a function for the user to issue invoices, upload and download documents, and to post announcements

Spring Web Application - Spring MVC, Vue.js, and Oracle SQL

SPIC, Tokyo, Japan

- Developed a web application which showed the product master data from a file server

Shipping Management Application - Access VBA, Access Database

SPIC, Tokyo, Japan

- Effectively repaired a shipping management tool and its database by adding screens to search data and created new tables to store shipping details on the database
